The Evolution of Coffee

Reishi Red Mushroom

Ganoderma Lucidum is the scientific name of the mysterious Red Mushroom (Reishi) that grows on only 2 out of 10,000 aged wild plum trees found in the dense and humid high mountains forests of Asia. It was crowned by the ancient Chinese as the “**Miraculous King of Herbs.**” For over *4,000 years*, *Ganoderma Lucidum* has been the most revered herb in Chinese *medicine*. To date, no known herb has ever challenged its superiority. There are literally *thousands of scientific studies published on the Internet* including over 500+ Clinical Trials at: Government Published Medicine. www.pubmed.gov Search = “Ganoderma Lucidum”

The **Reishi Red Mushroom** (Ganoderma Lucidum) is the original **Super Food of Emperors**. Unfortunately, it was not available to the common people. In 1980 world renowned mushroom scientist, Mr. Leow Soon Seng began 15 years of intense research and development. He identified exactly which six varieties had the most dramatic effect on human health. Gano Excel was born in 1995. In 2010 we have over 5,000,000 satisfied customers in 60+ countries. We welcome our friends in North America to turn a coffee break into a healthy Super Food break.
